

USB-MIDI interfaces that have been confirmed to work with ELZ_1 MIDI HOST MODE

The following USB-MIDI interfaces have been confirmed to function with the ELZ_1.

Manufacturer	Model	Confirmation result	Notes
Roland	UM-ONE mk2	Success	Use TAB mode.
iConnectivity	mio	Success	
EDIROL	UM-1X	Success	
EDIROL	UM-1SX	Success	

Firmware used during confirmation: SYSTEM Ver. 1.0.77

The following USB-MIDI interfaces have been confirmed to NOT work with the ELZ_1.

Manufacturer	Model	Confirmation result	Notes
YAMAHA	UX16	Failure	This product is not USB MIDI class-compliant, so it cannot be used with the ELZ_1.

USB mini host cable confirmed to work

To use MIDI HOST MODE, connect a USB mini host cable (Mini USB (male)–USB A (female)).

Manufacturer	Model	Confirmation result	Notes
TFTEC JAPAN	USB-M5H/CA20	Success	

Warning!

Depending on its shape and how it is used, using a non-cable USB mini host converter could put a large load on the USB port. Since this could cause damage, please avoid using USB mini converters shaped like the one shown below.
